## **DETAILED ACTION**

### ***Drawings***

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the computer program (logic steps schematically shown) of claim 12 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3612

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 3, 5, 7, 8, 9 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by France-Design, FR 2694245, cited by applicant.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1, 3-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Antreich in view of France-Design.

Antreich has rigid rear 5, rear window shown, front roof section with rigid parts 3,4, with 4 behind, and with 3 movable over 4.

The lowered roof parts of Antreich are substantially horizontal. It would have been obvious to one of ordinary skill to provide in Antreich nearly vertical storage of overlapped front roof parts 9, 10 as taught by France-Design in figure 5 with the roof parts located below a beltline of the vehicle in order to retain maximum trunk storage space with the top collapsed.

As to claim 4, see four bar linkage at 17,18 with roof section 3 forming one bar.

Art Unit: 3612

As to claim 6, see figure 6 of Antreich.

As to claim 7, see figures 12, 13 and accompanying discussion.

As to claim 8, see figures 6 and 13.

As to claim 10, see four bar linkage 14,15, substantially mutually parallel as is that of applicant.

As to claim 5, Antreich and France-Design both have independently movable front roof sections.

6. Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Antreich in view of France-Design as applied to claim 1 above and further in view of Weissrich et al.

It would have been obvious to one of ordinary skill to provide in Antreich, as modified by France-Design, computer control of roof position as is common knowledge in the art as taught by Weissrich et al. in order to fully control roof movement.

#### ***Allowable Subject Matter***

7. Claim 11 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Response to Arguments***

8. Applicant's arguments filed 10/4/2007 have been fully considered but they are not persuasive.

Regarding the date of the Antreich reference, the relevant date under U.S. Patent law is the date of filing, 7/15/2002, prior to the priority date of applicant.

Art Unit: 3612

Discussion of structural distinctions is not relevant unless reflected in the claim language. Further, see the rear roof part of France-Design, with both sliding of the front sections and limited (non-opening) of the rear in figure 4.

### ***Conclusion***

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
